FRP · 39 TO 104 LITRES

Water treatment tanks

One fibreglass vessel, three jobs. Fill it with softener resin, activated carbon or multimedia, and size it to the flow you need.

Key features

- **No rust, ever.** Fibreglass-reinforced plastic won't corrode inside like steel.
- **Light to handle.** One person can position it by hand.
- **Standard 2.5" top.** Takes the usual top-mounted control valves.
- **10 bar rated.** Liquids up to 50 °C.
- **Stands on its own base.** Supplied with base fitted.

Sizes

Size (in)	Volume	Ø × H (mm)	Connection	Max. pressure
10 × 35	39 L	250 × 875	2.5" top	10 bar
10 × 44	50 L	250 × 1100	2.5" top	10 bar
13 × 54	104 L	330 × 1350	2.5" top	10 bar

Supplied as an empty vessel with base. Media, control valve and internals sold separately.

Choose the media

Softener resin

Removes hardness, so less scale in kettles, boilers and pipes.

Activated carbon

Reduces chlorine, taste and odour across the whole supply.

Sand / multimedia

Traps sediment and cloudiness at higher flows than a cartridge.

Not sure which size or media?
Tell us your flow and a water test result, and we'll size it.
